

PROGRAM CARTRIDGE

STAR WARS GAME

OWNERS MANUAL

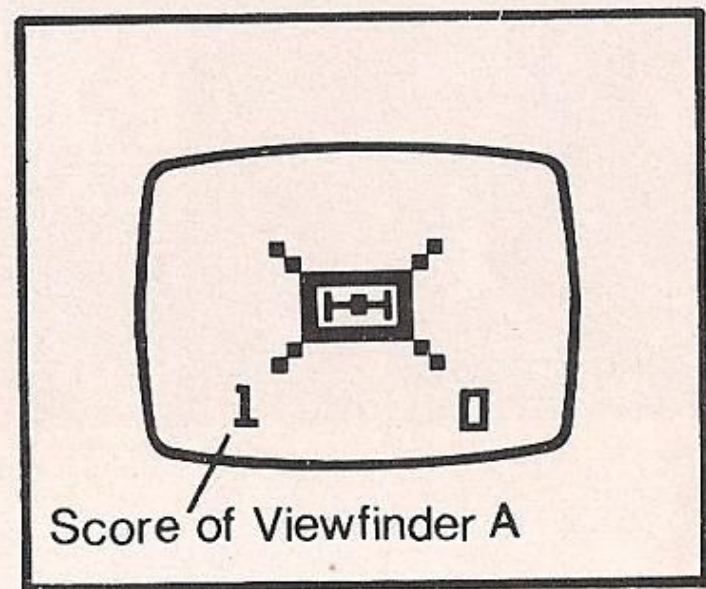

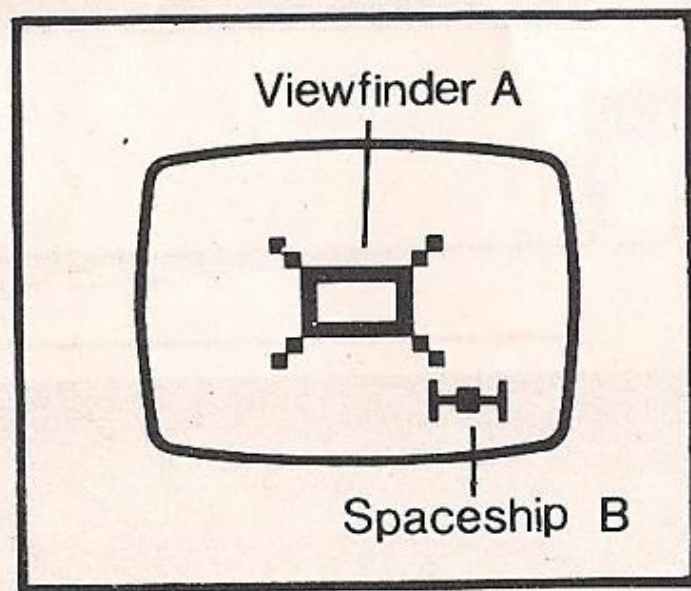

STAR WARS

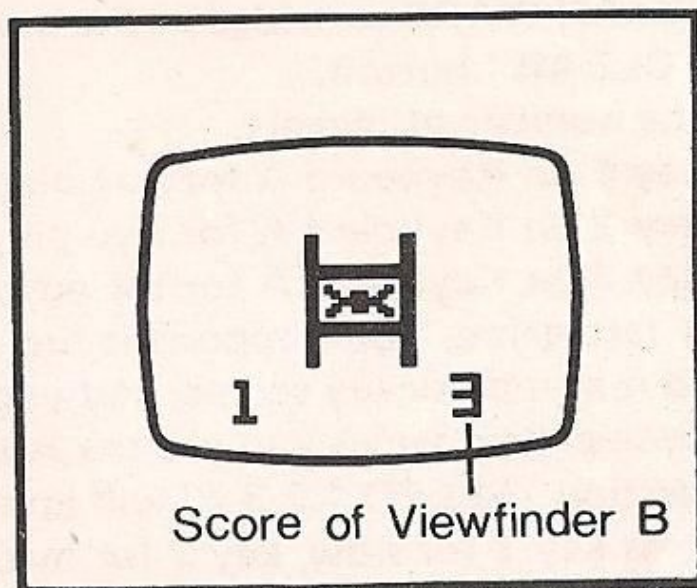

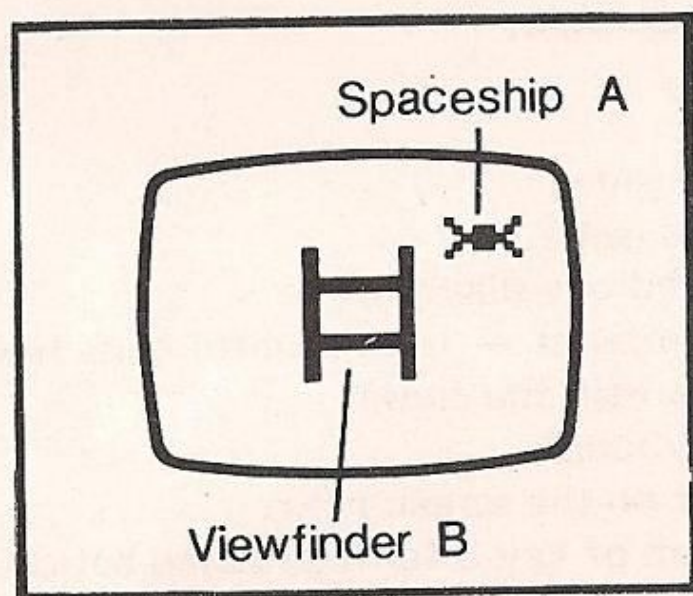

DESCRIPTION:

This game, based on the movie **STAR WARS**, provides a display showing the viewscreen of a combat spaceship. In the center of the screen is the viewfinder for automatic weapon fire. Your objective is to position the smaller enemy spaceship entirely in the viewfinder and score a hit.

Of course, you may be pursued by your opponent and then your objective is to steer off the screen. When you do move off the screen, you begin to chase your opponent. If the enemy is able to escape from the display, he becomes the next chaser (reversing the player role).

The viewfinder and the spaceships of the players A and B have a different shape and color:

Viewfinder	A	(red)
Spaceship	B	(yellow)
Viewfinder	B	(yellow)
Spaceship	A	(red)

NOTE: Press CLEAR key before removing the cartridge.

HOW TO PLAY

You should start with the two-player game first to get a feel for the action and spaceship movement even if you're playing by yourself. Then play the one-player game at slow speed to increase your skill.

1. Insert STAR WARS cartridge in the main console.
Press "CLEAR" button.
2. Select the number of players.
Press **key 1** on Keyboard A for one player game.
Press **key 2** on Keyboard A for two players game.
Press **key 3** on Keyboard A for the advanced one-player game.
In this last game, your opponent-the computer — is so skillful that having once escaped it automatically scores, and you remain the chaser.
In the one-player games you use the A Keyboard.
3. The question "SPEED 1 2 3 ?" will appear on the screen next.
You press key 1 for slow, key 2 for medium or key 3 for high speed action.
In the one-player games you use the "A" Keyboard for your selection. In the two-player games you may use either keyboard for speed selection. The keyboard you select determines who start chasing.
4. Each player uses the direction keys 2, 4, 6, 8 on his respective keyboard to steer his spaceship. If your spaceship is being chased (you are the smaller ship), key 2 moves your spaceship up, key 8 down, key 4 left and key 6 right.
If your spaceship is the pursuer (your ship is the viewfinder), key 2 moves the enemy spaceship down, key 8 up, key 4 right and key 6 left.
5. The game ends when one player has destroyed nine spaceships. Scores will be shown each time a spaceship is hit or when a spaceship moves off the screen.
